Career Objective

Software Developer with hands-on experience in React.js, React Native, JavaScript, and REST API integration, seeking to contribute to scalable and user-focused applications. Eager to apply strong problem-solving and development skills while continuously learning and growing in a collaborative engineering environment.

Education

University of petroleum and Energy Studies

Bachelor in Computer Science Engineering | CGPA: 7.5 /10

Dehradun, Uttarakhand

(2021– 2025)

Vidya Mandir Public School

Class XII | PCM | Percentage : 91 %

Faridabad, Haryana

(2020 – 2021)

Work Experience

Frontend Developer – 61C STUDIOS

(Feb 2026 - Present)

- Developed responsive web interfaces using React.js, JavaScript, HTML, and CSS.
- Integrated REST APIs and implemented dynamic frontend functionality.
- Built and enhanced the 61C Studios website, fixing UI issues and improving user experience.

Associate Software Developer – Genefied.ai

(Jan 2025 - Feb 2026)

- Contributed to web and mobile applications for clients including Borosil, Bisleri, CG, Century Ply, KEI etc.
- Worked on REST API integration, UI development, dynamic data handling, debugging, and feature enhancements.
- Collaborated with the team to develop and maintain production-ready applications.

Developer Intern – IBM

(June 2024 - July 2024)

- Developed a cloud-based smart parking system as part of a smart city model, integrating it with an Android application to manage real-time parking data and enhance urban mobility.

AWS Developer Intern – CORIZO

(June 2023 - July 2023)

- Developed a static website on Amazon S3 with public access and created a chatbot for booking hotels using Amazon Lex, conveying booking details to users, including room prices and providing information on available room types.

Academic Projects

Minor Project I – Home Plant Monitoring System | IoT

(Aug 2023 - Dec 2023)

- Developed an IoT-based system to monitor **plant and environmental conditions** using sensor data.
- Implemented real-time monitoring to support **automated plant care and condition tracking**.

Minor Project II - Heart Disease Prediction | Machine Learning

(Feb 2024 - April 2024)

- Developed a machine learning model to predict **heart disease risk** using patient health data.
- Implemented **Random Forest and Gradient Boosting** algorithms for predictive analysis and model evaluation.

Technical Skills

- Languages:** JavaScript, C++, SQL, HTML5, CSS3
- Frameworks & Libraries:** React.js, React Native, Next.js, VUE
- APIs & Web:** REST APIs, API Integration, JSON, Responsive Web Development
- Databases:** MySQL, MongoDB
- Cloud:** AWS (EC2, S3, Lambda, IAM, RDS), GCP (Compute Engine, Cloud Storage)
- DevOps & CI/CD:** Git, GitHub, Linux, CI/CD, Jenkins, Docker
- Development:** Component-Based Architecture, Reusable Components, State Management, Debugging, Performance Optimization, Agile/Scrum, Problem Solving

Certification and achievements

- AWS Academy:** Cloud Developing & Cloud Architecting
- CloudThat:** Cloud Operations on AWS
- Spanish Language:** A1 & A2 Certified
