PROFESSIONAL SUMMARY

Software Engineer with experience in designing, developing, and improving reliable and scalable software solutions. Strong foundation in problem-solving, software development, data structures, and system design, with a focus on writing efficient, maintainable, and high-quality code. Experienced in collaborating with cross-functional teams to build and improve software solutions.

TECHNICAL SKILLS

Languages: C++, JavaScript, HTML5, CSS3, SQL, python

Frameworks/Libraries: Node.js, React.js, Next.js, Vue.js, React Native

Databases: MySQL, MongoDB, AWS RDS

Tools & Platforms: Git, GitHub

Cloud & DevOps: AWS (S3, EC2, Lambda, AMI, EKS, ELB), Microsoft Azure, CI/CD

Security & SIEM: IAM

Other Technical Skills: REST APIs, Data Structures & Algorithms, Data analysis, Automation Test

EXPERIENCE

61C STUDIOS

Delhi

Associate Software Developer

Feb 2026 – Present

- Designed and implemented Films, Design & Photography modules in Next.js with reusable React components, reducing duplicate development effort by 30%.
- Optimized media delivery using Next.js image optimization and lazy loading, lowering average image payload by 40% and improving page load performance.
- Built Node.js REST APIs and MongoDB CRUD workflows for a custom content management system to power dynamic content; integrated AWS S3 for scalable media storage and retrieval.

GENEFIED.AI

Delhi

Associate Software Developer

Jan 2025 – Feb 2026

- Developed retailer loyalty modules Gift Catalogue, SKU Analytics, KYC, and Campaign workflows supporting 30,000+ active users across client platforms.
- Integrated backend REST APIs in Node.js with AWS RDS for real-time retailer, points and reward data flows, reducing data inconsistencies by 25%.
- Built reusable UI components that cut recurring UI defects by 20% and improved front-end stability.
- Deployed and tuned production applications on AWS (EC2, RDS, S3, IAM), improving API-driven responsiveness by 25%; diagnosed and debugged production issues while coordinating cross-functional efforts to accelerate feature delivery by 20%.

IBM

Gurugram

Cloud Developer Intern

June 2024 - July 2024

- Contributed to a cloud-based Smart Parking model within the development team, working on C++, API integration, cloud deployment, and real-time data handling to enable dynamic parking availability and improve data-update responsiveness by 25%.
- Implemented data validation and API testing workflows to analyze real-time data inconsistencies and update failures, reducing integration errors by 15% through debugging and integration fixes.

ACADEMIC PROJECTS

Home Plant Monitoring System | Arduino, Sensors, C/C++, IoT

Aug 2023 – Dec 2023

- Built an Arduino-based IoT system using C/C++ to collect and process plant sensor data, storing readings in CSV format for analysis.

Heart Disease Prediction | Python, Pandas, Scikit-learn, Random Forest, Gradient Boosting

Feb 2024 – Apr 2024

- Developed a Python-based machine learning pipeline using Pandas and scikit-learn to predict heart disease risk from patient health data. Engineered features and trained ensemble models to produce risk predictions and evaluated model performance on held-out data.

EDUCATION

University of Petroleum and Energy Studies

Dehradun, Uttarakhand

Bachelor in Computer Science Engineering | CGPA: 7.5/10

2021 – 2025

CERTIFICATIONS

- Cloud Developing & Cloud Architecting, AWS Academy
- Cloud Operations on AWS, CloudThat
